

AMMO—N

Liquid Ammonium Nitrate

With the introduction of regulations on the sale of Security Sensitive Ammonium Nitrate (SSAN) products, many growers are looking to alternative products. Paton Fertilizers are able to offer a liquid Ammonium Nitrate that does not have these restrictions.

Composition

Total Nitrogen (w/v)	24.8%
- As Ammonium	12.4%
- as Nitrate	12.4%

Weight per Litre at 20°C	1.25Kg
Grams Nitrogen per litre	248g
pH	5.2-5.3
Salting out	5°C

Advantages

- No Security Sensitive or Dangerous goods license is needed.
- Nitrogen in the quickly available Nitrate form and the longer lasting Ammonium form.
- Compatible with most solubles and liquid fertilisers. (perform a "jar test" to confirm)
- High analysis straight Nitrogen
- Available in 20L, 200L and 1000L shuttles.

Application Rates

Foliar Application

TURF:	200—400 ml / 100m ²
FRUIT CROPS:	6-12 L / hectare
VEGETABLES:	9-12 L / hectare
VINES:	6 L / hectare
OLIVES:	8-12 L / hectare

Fertigation Application

Apply at 12-25 L / hectare as needed for a wide range of Horticultural crops.

Directions for Use

Agitate contents of container before dilution. Use the above amounts in a minimum of 1000L water per hectare or a 1 in 100 dilution. Agitate before application to ensure thorough mixing. For foliar applications apply to achieve thorough coverage of leaves
