

PRODUCT INFORMATION

PowerFeed PRO SERIES

TOMATOES & VEGETABLES

PowerFeed PRO SERIES for Tomatoes & Vegetables is a dynamic fertiliser and soil improver with fish, seaweed and extra soil improver*.

A premium performer for larger yields of tasty tomatoes and vegetables, it contains a balanced nutrient and trace element mix to promote vigorous growth.

Boosted with seaweed it helps stimulate strong root growth and increases tolerance to heat, drought, frost, pests and diseases.

Liquid compost helps improve soil health to maximise nutrient and moisture retention.

INSTRUCTIONS FOR USE

PowerFeed PRO SERIES for Tomatoes & Vegetables is a fast-acting liquid that goes to work immediately whether applied to the soil or foliage. For best results, apply regularly every 1 to 2 weeks throughout the year depending on the crop.

Safe on all plants and soils, it can be applied via a watering can. Generally, mix 50mL of concentrate per 9 litres of water or follow the application table below for more specific rates. Each 9 litre watering can treats up to 2 to 4 square metres of plants or soil.

PLANT TYPE	APPLICATION	APPLICATION FREQUENCY
Foliar Application	20mL	1 - 2 weeks
Seedlings	20mL	1 - 2 weeks
Established Vegetables	50mL	1 - 2 weeks

TYPICAL ANALYSIS

W/W: Nitrogen (N) 14.0%.

Phosphorus (P) 1.4%.

Potassium (K) 8.0%

*Compared to PowerFeed All Purpose including Natives (green bottle).

Promotes strong, vigorous growth

Stimulates flowering and fruiting for larger yields of tasty produce

Improves plant health while helping to reduce environmental stresses

Improves the soil structure to break down clay and reduce nutrient loss in sandy soil

USAGE TIPS

PowerFeed PRO SERIES for Tomatoes & Vegetables is the perfect partner for any vegie garden or pot.

- ✓ Quick and easy to use, it's great for soil or potting mix.
- ✓ Apply when harvesting or maintaining your vegies and wash all produce thoroughly before eating.
- ✓ Vegies are gross feeders, so feed regularly every week to fortnight for healthy, rich soil and productive crops.
- ✓ To avoid plant stress on hot days, apply early in the morning or late in the day when it is cooler.
- ✓ In cold and frosty weather apply early morning to the soil to reduce the effects of fungal diseases on wet leaves.
